Career goals – Personal Statement

My goal is to work and live in Switzerland with Respect, Sense of Duty, Motivation and Creativity.

So I need the first real contact and regular permits to stay in this country. Because I'm tired of the contradictions of my country, many times lacking work's occasions and poorly organized. My intention is to be employed with professionalism and integrate my knowledge with the spirit and goals of my future company. So I'm sure to inspire your interest in simple words.

My strenghts – My Goals
- working on HARDWARE and SOFTWARE Solutions and troubleshooting of Linux/Windows/MAC/PRINTERS/ROUTERS/NETWORKS and all DEVICES connected as a **specialized technician**. (installing and starting OS and software, fix and connected parts of Hardware, repairs)
- working as **Designer** with Adobe Products or similar (Illustrator, Indesign, Photoshop, Dreamweaver, Fireworks) .
- Manage Domain Names and setting up web servers (IIS, Apache).

- I' m not completely specialized in programming (PHP/MYSQL, ASP DATABASES, scripting, ecc) but I will be able to **check, analyze and coordinate** the programmers' and designer's tasks.
- I can also work on **security and Linux Server administrator** (Debian, Centos, RedHat)
- Otherwise I can manage and create little but sophisticated networks systems for small office or single user. Networking infrastructures and wifi networks (router configurations, switches ecc) For example connecting one office with two or three floors and 20 pc, 1 server, cabled or wifi network, IPcam, TV, Sharing, and printer and connection with the DNS, tablets ecc.

Obviously I could work alone, online or in team either.
I'm sorry for my scholastic French, is it actually in training and I' m sure that in few months will be better.

Work experience - Employment

June 2009 > March 2013   Information technology specialist
Company   **M.I.A. di Roberto Rea - CliccAqui.org**

Additional information

Musician Pianist Arranger Sound Engineering

Fantasy and finding solution are my goals in many application's fields. Self-taught, I have studied music all my life for passion with great result (harmony and piano techniques, style jazz blues standard). I also specialist on Sound Engineering, create and manage AUDIO FILES, very good knowledge of piano-keybords and sound techniques and arranager synthesizers, records tracks with the most populars softwares as CUBASE, SONAR, COOLEDIT, FINALE, REASON, LOGIC, ecc (MAC/PC) Midi Specialist, Music Composer and Arranger a real hardware technician + creative imagination. that's it. :) Regards

Trader experience
With a Fineco Bank for my personal passion, I was two years involved with stocks futures and currency, technical analysis in NYSE NASDAQ and Swisse Markets, In this exciting experience I've managed not to lose any money in my final balance, and I gained a good knowledge of how financial markets work.

Regards

Thank you for your attention
